Date: (DD/MM/YYYY)  /  /

Comments:

- CONDITIONS OF AGREEMENT FOR MINOR CAPITAL WORKS**
1. The Council Applicant consents to the light being operational on the completion of the construction and accepts the commencement of the applicable charges from the date the lights are energised. This includes the capital recovery of the light, outreach, and pole in line with the current AER capital annuity charges where not paid for upfront.
  2. The Council accepts all responsibility for the lighting levels resulting from the installation; including potentially not meeting the lighting levels required in AS/NZS 1158.
  3. It is the Council's responsibility to assess whether a lighting design is required to meet the lighting levels in AS/NZS 1158. If deemed required such as for pedestrian crossings, roundabouts and four-way intersections on Category V roads, then Council must either engage an accredited designer or use Essential Energy to conduct this work and provide the lighting design with this submission.
  4. Where a Minor Capital Works is not possible for the requested location, it is Council's responsibility to evaluate whether any further work is still required, and this will need to be completed through the contestable works process.
  5. The Council Applicant must be an authorised representative from the Council and cannot be a member of the public. Any requests from a member of the public must be sent to the respective Council for acceptance and submission.
